Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

RESTRICTION REQUIREMENT

1. Responsive to Applicant's amendment, this application now contains claims directed to the following patentably distinct species of the claimed invention:

(A) The species in which there are six three-dimensional elements which correspond to six corners of the complex structure (which becomes formed when the elements are mated to the product), (as represented in claim 51 and as apparently shown in Figures 7-9 inasmuch as an embodiment that includes eight corner elements will inherently include six such elements);

(B) The species in which there are two three-dimensional elements, wherein each corresponds to a respective half of the composite structure and adapted to receive a side of the of the product (as apparently discussed with respect to the embodiment of Figure 11; see page 13, beginning line 5).

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 47 and 48 appear to be generic or common to the species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as

provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any other species presently claimed will be examined with the elected species A or B.

3. The examiner notes that there appears to be no support in the original disclosure for six three-dimensional corner elements in which each of the elements includes plural cavities as required in claim 62. Claim 62 will be rejected under 35 U.S.C. 112, first paragraph in the next Office action on the merits as having new matter.

It is expected that the next action on the merits, in response to Applicant's election, will be made final.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jimmy G Foster whose telephone number is (703) 308-1505. The examiner can normally be reached on Mon-Fri, 8:45 am - 5:15 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (703) 308-2672. The fax
